

WESTPAC NEW HOMES
OVER \$2 MILLION AWARD

An extensive range of natural products has been used in this exquisite family home, including slate, schist, exposed timber, copper and glass. The use of these materials ensures this home blends beautifully into its stunning location on the edge of Lake Wakatipu.

This house has been designed and built to last, not only with its traditional features, but also with its robust building systems, fittings and fixtures.

An extremely high level of detail has been achieved both on the interior and exterior, with the use of western red cedar cladding, French oak flooring and lacquered walnut veneer joinery to name but a few.

The versatility in design allows for this five bedroom home to be a haven of tranquillity for its owners, as well as a fantastic place for entertaining family and friends. With all bedrooms complete with ensuites, his and her offices, multiple living rooms, fireplaces, heated pool, steam room, gymnasium, theatre, gourmet kitchen and separate scullery, and spectacular views, it offers the very best in comfort and luxurious living.
